

Power Distribution Module

*“Trombetta’s
Power Distribution Modules
provide a central location
for relays, fuses, and logic;
reducing wiring and
assembly cost”*

Environmentally protected, the Power Distribution Module is ideal for applications such as Lawn & Garden Tractors, Power Sport Vehicles, Ag & Construction Equipment, along with many other applications.

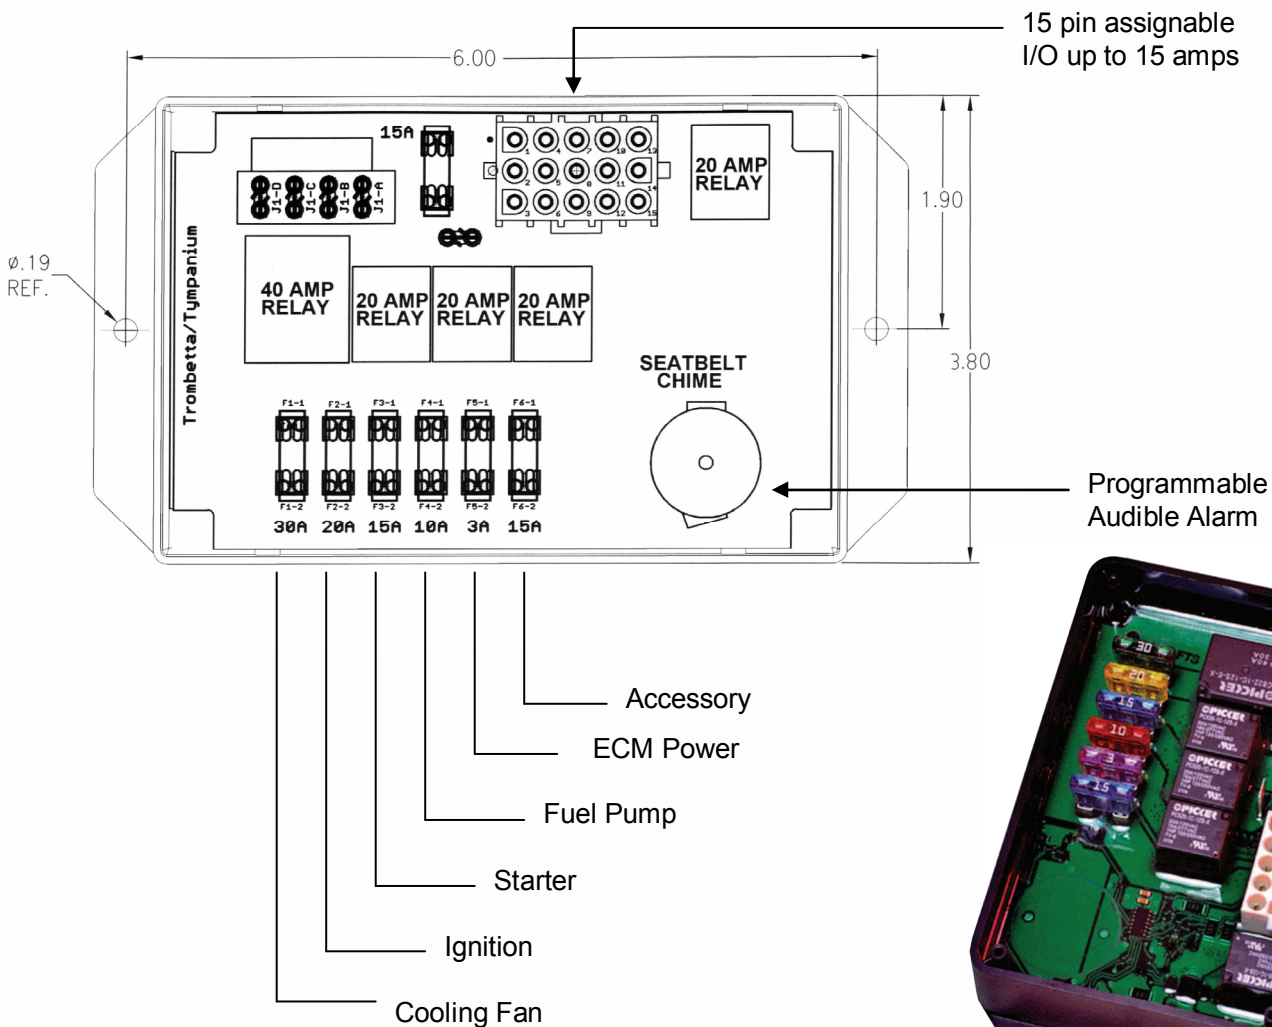

The Power Distribution Module can be customized; providing a central location for relays, fuses, and logic which reduces wiring and assembly cost. The Power Distribution Module may include functional controls such as glow plug timing, safety interlocks, seat belt chimes and your specific needs.

TROMBETTA 
DC Power Solutions for a Harsh World

Power Distribution Module

This is an example of a Power Distribution Module, it can be customized to fit your application

Input/ Outputs	(4) High Power: 45 amps (15) Low Power: 15 amps
Fuses	Standard ATO replaceable fuses
Sealing	Environmentally Protected
Housing	Thermoplastic or Aluminum
Leads	May be terminated per customer specifications

Example of module (electrical diagram example and dimensions of std. box)
